

## **Abstract**

The thesis deals with the creation of the methodology of holding Bible discussion meetings for adults in the parish of Žamberk. The theoretical section focuses on the importance of the Bible in the life of a Christian and finds its resources in the documents of the Magisterium of the Church, especially in the Apostolic Exhortation *Verbum Domini* and in the dogmatic constitution *Dei Verbum*. The thesis selects the criteria for catechesis with the Bible from the documents.

The objective of the project is to create its own methodology for a particular group of adult believers from the parish of Žamberk. When creating the methodology, results of a probe from other parishes are taken into account. The methodology is tested and its evaluation is based on the feedback of the participants.
