

## **Abstract**

The bachelor thesis aims at introducing some information about the life of writer Erich Maria Remarque. To sum up his biography - from birth to death - and to mention his inspiration and life experience to write such important works. Then the bachelor's thesis will be devoted to two particular prose works, mostly book *All quiet on the western front* and *the Three Friends*. Each work will mention the basic information, the circumstances that led to the creation, the theme of the novels, the filmography, the characteristics of the characters that appear in the works, and then a detailed description of the happening. In the last chapters of the bachelor thesis we will first point to the common characters or, on the other hand, to the differences between the two above-mentioned authors' works, then the works of the others. There will be a brief analysis of other Remarque prose and a reference to the common elements that accompany the work.
