

Annotation

The aim of this work is to describe life in a Roma settlement on the basis of literature and then to capture it directly in reality and to compare these two views. In the introduction, I also deal with the general characteristics of the Roma when I turn to the specifics of the Roma settlement. In the practical part I used qualitative research methods with observation technique and verifying the information from the theoretical part directly in practice.

Key words:

Romové, romské etnikum, romská minorita, majoritní společnost, majorita, romská osada
