

Abstract

The aim of my thesis was to analyze the development of criminality for the period of 2013-2019 in Mladá Boleslav and inform the general public about integration problems, criminality and employing of foreigners in MB. The study is focused only on Mladá Boleslav and its surroundings, in which both employment at company Škoda AUTO a.s. as well as criminality increased in a short period of time. In the theoretical part we come across basic concepts such as criminality, prevention, demography and probation and mediation service. I tried to summarize these topics and point out the most important information. Thesis in the practical part shows development of criminality in Mladá Boleslav. Furthermore, the empirical part contains the interview with the officer of the Department of Security and Crime Prevention at the Municipality of Mladá Boleslav and with the City Police on the topic of criminality in MB and its prevention programs. At the end of my thesis, I recommended the importance of preventive programs, that have helped the city a lot.
