

Abstract

The aim of this work is to compile a comprehensive inventory of bells until 1914 in the territory of Pilsen-North, focusing on their Epigraphic and Plastic Decoration, including data on requisitions, which took place in 1914-1918. One section consists of bell-makers and bell-making families who made bells for individual localities. The whole work is completed by a brief history of churches in the designated localities and available photo documentation.
