

The topic of abortion I chose because this can correspond with other problems, which can cause, that the client find out the pastoral worker. I think, that except the graduated specialist, among the pastoral worker, there is not so high level of awareness how to proceed the meeting with the client, who actually solve the problem of abortion. As the target of my work I marked out to write the well-arranged tool, which can succesfully use not only the pastoral workers. By examining this topic I tried to anylyse available sources and from them set the simple and clear abstract, what, because of the wide of this topic, was not simple job. I also communicated with the specialits, that regulary work with the client, which are solving the problem of abortion. Because of that for lot of them is going about very private topic and information about client can't be passed in full width, the acquirement of many outputs of our communication was often difficult. But I mind that this compilation can be helpful for many pastoral workers, gives the elementary self-contained information about topic of abortion and as contains actual contacts, they can simplier find the help of specialist for clients in need.
