

## **Abstract**

KITTNAROVÁ, Denisa. *Communication training and social integration of people over cerebral apoplexy*. Prague 2021. Diploma thesis. Charles University in Prague. Hussite Theological Faculty. Department of Psychosocial Sciences and Ethics. Thesis supervisor PhDr. Beáta Krahulcová, CSc.

The main goal of my diploma thesis was to find out, how successful it is to integrate people over cerebral apoplexy into normal social and working life. The theoretical part introduces the reader to the cerebral apoplexy as such. It also deals with phatic disorders caused by cerebral apoplexy and brain trauma, rehabilitation and its possibilities, communication, and communication training and, last but not least, social services. In this thesis, I chose a qualitative method to obtain data using a semi-structured interview. At the end of this diploma thesis, the results of the research survey are processed and interpreted.
