Mentor's comments both on the thesis and the student's approach:

Navid Sharif has demonstrated the ability to work carefully and independently in the laboratory. His main scope of work was learning the method of Western blot analysis, which ranks among more difficult immunoanalytical methods. During the course of writing the thesis, he demonstrated very good skills in working with literature. The choice of literature sources and the ability to summarise the findings relevant to the topic were excellent. Interventions by the supervisor were of a minor nature, the minor

assistance was corresponding to the difficulty in the interpretation of the results. Overall, the thesis fully meets the requirements set for an experimental thesis.

Evaluation of Master's thesis: excellent

Recommendations for the thesis defense: recommended
