

CHARLES UNIVERSITY
FACULTY OF PHARMACY IN HRADEC KRALOVE
Department: Department of Biological and Medical Sciences

Master's degree program in Pharmacy
Mentor's evaluation of Master's thesis

Student's name: Yina Yun

Thesis mentor's name: Assoc. Prof. PharmDr. Miloslav Hronek, Ph.D.

Year of the thesis defense: 2022

Title of the thesis:
Roles of Nutritional factors against COVID-19

The topic of the thesis was chosen from the list of topic in the department

Working with literature very good.

Language skills very good.

Student invention very good.

The student was working independently with mentor help.

Problems and issues were solved independently with mentor help.

Working in the lab was not available, literature review.

Interpretation of the results not available, literature review.

Processing of the thesis was correct with mentor corrections.

Graphical processing of the thesis good.

I recommend Diploma thesis for the recognition as Rigorous thesis .

Mentor's comments both on the thesis and the student's approach:

The DT text was processed by the graduate student independently. In terms of content, it belongs to works with a smaller scope. During the holidays, she sent the final text to the mentor shortly before the deadline for uploading to SIS, so it was not possible to complete the DT and increase its level in the form of supplements as an extension of some parts (e.g. the intake of nutritional substrates and their effect on the immune system, the final draft of the composition of the diet for patients with Covid infections) or graphs and tables, which would increase the clarity of information in the search and

would also be a benefit in itself. In addition, it was necessary to correct the literature citations in the DT, which entailed resubmitting the DT in the SIS. From the above, I overall grade DT as good.

Evaluation of Master's thesis: good

Recommendations for the thesis defense: recommended
