ABSTRACT:

In this theses I deal with the theme of perception of the teacher with body modifications such as tattoos, piercings, etc. by other teachers at school. In the theoretical part I will explain all the terms from the field of pedagogy as well as the topic of body modifications. The practical part will be dedicated to the personal experiences, opinions and thoughts of teachers without body modifications, and the method of semi-structured interview will be used to find out this information. To supplement the information obtained from the interviews, the practical part will also include case studies with teachers who have body modifications.

The goal of the thesis is to find out if teachers with modifications are perceived by other teachers positively, negatively or neutrally. Furthermore, whether the modifications affect the behavior of other teachers towards them, their approach, if they try to avoid them or have no problem cooperating with them, or whether they do not take into account the look of the teacher with the modifications at all.
