

The selective abstract:

Rigorous work The classification supplementary and dispensation of feed supplement for gravid women from selected pharmacy in the years 2006 and 2007 treat of suitability for supplementary usage during gravidity.

In this work I also evaluate individual supplement`s for gravidity period that are used in the years 2006 and 2007 in the Czech market.

Result of my rigorous work is recommendation for give priority to healthy and mixed fare during gravidity before vitamin supplement. This kind of recommendation is valid just for normal physiological conditions for all kinds of vitamins and minerals except of folic acid that they should be used before planned pregnancy.

The products Centrum materna, Calibrium mami or Calibrium babyplan I can recommend each time if they have incomplete nutritive-supply.
