

Abstract

The diploma thesis focuses on the personality of the lawyer and politician Dagmar Buresova. It aims to present the media image of the politician Dagmar Buresova in the Czechoslovak Radio set in the historical and political context of the time. Her political mandate is limited from December 1989 to June 1992. Firstly, she was a Minister of Justice and then a President of the Czech National Council. The empirical part of the thesis examines, with the help of framing analysis, a total of 29 audio recordings from the archive of the Czech Radio in Prague, which are associated with Dagmar Buresova in the context of her active participation in politics. In order to provide a more comprehensive grasp and the possibility of comparing the media images, the author enriched the research part with the analysis of audio recordings from the period outside the active involvement in politics within the Czech Radio until the end of 2022. During this period, the author examined a total of 7 recordings. In addition, for the purposes of this master's thesis, three interviews were also conducted with personalities from various fields, whose answers offer yet another angle on JUDr. Dagmar Buresova.
