

## **ABSTRACT**

This bachelor thesis deals with leisure time and leisure activities of middle school age pupils in Slaný. The thesis consists of two parts - theoretical and research. The theoretical part describes and defines the basic concepts related to the work, such as leisure, leisure education, leisure education facilities and characteristics of secondary school-age children. The last chapter is then devoted to a brief description and characteristics of leisure education in Slaný. The research part elaborates on a questionnaire survey conducted among sixth and seventh grade pupils of primary school in Slaný. The main objectives were to find out how pupils spend their free time, what leisure activities and clubs they prefer in their free time and whether or not there is satisfaction with the offer of leisure activities in Slaný. The results have been processed into tables and graphs and the data from the research reflect the current situation.
