Identifikační číslo studenta: 81364734

Typ studijního programu: magisterský Studijní program: Farmacie Studijní obor: Farmacie 599102

Název práce: Analysis of selected nutraceuticals by liquid chromatography

Pracoviště práce: Department of Pharmacognosy and Pharmaceutical Botany

(16-16230)

Jazyk práce: angličtina Jazyk obhajoby: English

Vedoucí: RNDr. Jaroslav Jenčo, Ph.D.

Oponent(i): prof. RNDr. Lubomír Opletal, CSc.

Datum obhajoby: 29.05.2023 **Místo obhajoby:** Hradec Králové

Termín: řádný

Průběh obhajoby: After the student's presentation to the committee, the student

presented to the committee the results of her thesis within a time horizon of 12 minutes. Subsequently, the supervisor's and reviewer's reports were read. The student responded to all comments and questions from the reviewer. In the open discussion, the following

questions were asked:

Did you identify compounds in the chromatogram, which is on page

48 in your diploma thesis?

Which peak corresponds to lupulon?

Why did you add a small amount of formic acid to the mobile phase?

The student answered all the committee's questions.

In the secret ballot, the student received three positive votes, and the

committee agreed on the final evaluation as very good.

Výsledek obhajoby:	velmi dobře (2)
