Year of defense: 2023

Keywords: Communication, elderly, dementia, ethics, dignity, nursing staff, nursing care, burnout syndrome

Bachelor thesis focuses on the communication of nursing staff with elderly people with dementia in nursing care. It deals with communication with respect to human dignity, and also looks at the prevention of burnout syndrome.

The basis of the bachelor's thesis is a quantitative research on the way of communication of nursing staff with elderly people with dementia syndrome and methods of staff's respite from work. The personnel studied are direct nursing care workers in hospitals and homes for the elderly in a total of 11 facilities (4 hospitals and 7 homes for the elderly) in the Hradec Králové region.
