

Title :

MINOR LIBERTY AND MAJOR LIBERTY: For a decolonial reading of the philosophical genesis in Colombia.

Abstract :

This research endeavours to restore the philosophical foundations of freedom at work in the protectorate of Indians and the praxis of the first bishop of Popayan Juan del Valle as a primordial moment of philosophical activity in Colombia, and then to show its contradictions not only as regards its provisions but as regards the freedom and tradition properly indigenous. We call this *major* freedom after the major right and duty of the Misak people.
