

In thesis "*The message and life of Jesus Christ – pedagogic preparation of curriculum according to Bavarian Lehrnplan for religion classes of German high schools*" I've delft into exegesis of selected themes from the New Testament theology. When working with the New Testament, I baist my research according to handling of text named "*Kulturwissenshaft*", which was developed by prof. dr. Sandra Huebenthal of Passau University. I chose this method because I had the opportunity to attend course by prof. dr. Heubenthal, which dealt with these aforementioned method. For each subject I prepared pedagogical materials for religion classes. I thought about how would I approach teaching these subjects. I chose such teaching methods with which I have personal experience from using them in practice.
