

Abstract

Title: Principles of Good Governance in a Selected Sports Organisation

Objectives: The main aim of this work is via exploring of each principle of good governance concept reaching overall and partial results for the selected sports organization.

Methods: Research is divided into four dimensions where each one contains different number of principles. Principles are divided into indicators. While using content analysis of relevant documents and additional interview with representative of a selected organization are these indicators rated. For all the variables then results come out which are statistically and via text interpreted.

Results: Results show a recent situation of the organization in dimensions of transparency, democratic processes, internal control and social responsibility. According to final results organization leads its best in questions of transparency. On the other hand, its worst is in the framework of social responsibility.

Keywords: non-profit organizations, minifootball, sports governance
