

Abstract

Bachelor thesis is the theoretical-empirical. Theoretical content deals with what authority is in general and how it is viewed. It also focuses on teachers. What a personality should teachers have, what is the authority of the teacher and what types of authority we know. The research part is realized using a questionnaire survey. It focuses on how the pupils of the Secondary Education School view the authority of the teacher, what they imagine under this term and what behavior supports or reduces the authority of teachers.

Key words: authority, teacher, pupil, secondary school, education
