

Errata

1) The file "PathfindingData\Runs.txt" contained a link to an archive with the results of the experiment runs. The archive was stored at <https://uloz.to/tamhle/gujfc6UoiA9b#!ZGZmLwR1MGSyLwHjLwt3BJZ0BGD4LwyOnH5iG3cWHIcvBGEx> a site not suitable for a thesis.

We re-uploaded the data to a more suitable site:

<https://github.com/Jan-Koblizek/PathfindingData/tree/main>. Short ReadMe was added explaining the structure of the results file.

2) "PathfindingData\Flows" contained wrong values for predicted flow (the flows for individual methods were correct). The graphs were generated based on a wrong flows data on accident. The original graphs showed predicted flow at the final gates, instead of the predicted flow at the target. The corrected flows and graphs are also available at

<https://github.com/Jan-Koblizek/PathfindingData/tree/main>.
