

## **Abstract**

This diploma thesis is dedicated to the settlement of the Jičín region in Eastern Bohemia in the Final Bronze Age and Early Iron Age. The first part contains the processing of the cemetery of Silesian and Platěnice cultures in the area of the hospital in Jičín which was partly excavated in 2019-2020. The second part of this work maps the findings of the Silesian and Platěnice cultures of the Lusatian Urnfields cultures in the Jičín region.
