Průběh obhajoby: The student presented the thesis relatively well, outlining the

research question, the methodology used, and the main results. The student then reacted to the comments raised in the advisor's and opponent's reports, with some satisfactory and some less satisfactory answers. The student answered the question on inflation, which was not implemented in the model and was just mentioned as a limitation of the model. He pointed out that the effect was partly catched by the

dummy variables for he individual years. He admitted that

coefficients might be slightly overestimated. The student explained

the proces of choice of the variables. He was answered how

representative was his sample. The student did not answer very well question whether the model was robust with such a large number of variables. The student did not answer the question on non-linearity of the movie budget. Thus, in line with the opinion of the opponent, and

balancing the strengths and the weaknesses of the thesis, the

committee decided on the grade C.
