<b>Comments from Defence Committee on Student Defence</b>	
<ol style="list-style-type: none"><li>1. Could your findings be explained by a more granular understanding of the PRR – you treat them as monolithic?</li><li>2. You rely on Och's definition of feminist arguments – what do others say and do you have a critique of Och's categorisation?</li><li>3. When you talked about why the research matters, you did not really get to the why so much as the context in which it might matter so could you please expand on this.</li><li>4. Is your subjectivity a problem in terms of the work you have done? And, in turn, is your striving for objectivity a problem?</li></ol>
