

The Current Cold War poses a significant threat to SpaceX's terrestrial and extraterrestrial operations. This thesis aims to develop a SpaceX grand strategy with geopolitics and geoeconomics as the primary motives. The goal is analyze how this corporate grand strategy can be aligned with U.S. foreign policy ambitions, so that there is a symbiotic relationship and stable growth for both of them. By utilizing strategic coordinated investments the US can help SpaceX diversify and improve its economic/logistical resilience to foreign power influence, while simultaneously accomplishing US foreign policy ambitions.
