

two basic types: non-melanoma skin cancer and melanoma. Skin tumors mean up to 5%.

The increase in incidence is due to both a strong knowledge of development issues and melanoma tumor detection and efforts to reduce its incidence. Also in the diagnosis of melanoma was diagnosis.

Although in recent years to s tumor.

I see a reduction in its incidence. Also in the diagnostic result in death, but are far from melanoma malignancy. This does not mean that they should vykousanou crayfish or crab. "investment melanoma occurred
