ABSTRACT

The main subject of the thesis is the inclusion of music activities into the educational subjects of Primary School. The thesis aims at a critical judgement of opinions on the importance of music activities integration into the educational subjects of Primary School.

The theoretical part introduces the organization of the integrated education, summarizes the existing knowledge of the music activities impact on the child's personality development on the side of scientific literature and other relevant sources, it exalts the outcomes of works focusing on music integration into the Primary School education.

The practical part researches the integration of music activities into the educational subjects of Primary School, compares the impact of the regular education and the specialised music-oriented education, and based on a questionnaire survey and personal observation, it evaluates the effect of such education from the perspective of the pupils, their parents and their teachers.
