

**Abstract:**

This bachelor thesis focuses on cubism as an artistic movement, but it does not fulfill an art historical purpose.

It explores the basics of cubism and proposes a final educational program for primary school students and lower secondary school students. The aim of the thesis is to introduce this artistic style through an educational program, which includes a walk through „cubist architecture“ in Prague, a visit to the Czech Cubism Exhibition at the House of the Black Madonna, and practical exercises with worksheets so that participants gain knowledge that will last in the long term.
