

Abstract

The work covers the entire breadth of Biblical themes arranged alphabetically from the Creation of the World up to the book Revelation of Saint John – Apocalypse. Besides the stories of Old and New Testaments there are represented important personalities of both Testaments.

There have also been added items inspired by apocryphal books of Old and New Testaments, items referring to the relation between Old and New Testaments /e.g. Typology/ or the items that are related to Biblical issues. Each item is profiled in a specific way – a short story of Biblical event is always mentioned and it is described in relation to its reflexion in art. Besides Biblical references the reader will find even the references to apocryphal literature, to commentaries of the Church authorities and to the examples of pieces of art in Bohemia and the world.
