

## Abstract

Title: Skydiving with a focus on error rate

Objectives: The aim of my bachelor thesis is to characterize and describe possible defects in the field of skydiving

Methods: To analyze the error rate in parachuting, the method of a systematic overview study is used, which is divided into the error rate of the parachutist and the error rate of the technique. The work contains photo documentation for a more thorough presentation of the analyzed errors and defects.

Results: The result will be a summary and an attempt to approach the issue of errors in parachuting.

Keywords: skydiving; parachutist; parachute; glitch; errors
