**Course of the examination:** Reviewers propose A, B and D with low B as an average mark. The main problem is that reviewers comment on similar topics but assess them differently. The second main problem is that selected points and strategies (period, theoretical model, documentation) are not well explained, justified or the level of accuracy is not very high. On the other hand, explanations and answers during defence were able to provide the exam board with sufficient information on the mentioned issues, additional questions were also answered in an excellent way, so the final verdict is low B.

**Result of defence:** excellent (B)
