Title: Knowledge of the prevention of cervical cancer in women of reproductive age

Supervisor: Mgr. Jana Matulová

The bachelor's thesis discusses the knowledge of the prevention of cervical cancer in women of reproductive age. It points to information about cervical cancer, its anatomy, risk factors, symptoms and options for protection and prevention.

The empirical part focuses on the knowledge of women of reproductive age regarding the issue of cervical cancer. It deals with knowledge of risk factors, symptoms, protection and prevention. The research part consists of a quantitative questionnaire. 97 questionnaires were sent out. A total of 71 questionnaires were returned to us.
