

ANGLICKÁ ANOTACE

POSTTRAUMATIC GROWTH FROM THE VIEW OF THEOLOGY AND PSYCHOLOGY

The diploma work in the theoretical part focuses on a posttraumatic growth of the persons who have had to face traumatic events from the point of view of theology and psychology, the influence of survived trauma on one's religiosity and the influence of one's religiosity on the possibility of posttraumatic growth. This part of diploma work should also present the rules of pastoral care of suffering people.

The practical research should prove christian faith helps in coping with trauma and also should compare an ability to cope with unexpected event by christians and nonreligious persons.
