

Subject: Review of diploma thesis

Project title: 3 D ultrasound evaluation in the I.trimester of pregnancy

Investigator: muc. Nicola Birgit Hillenbrand

The project is devoted to the problem of using 3D ultrasonography in the I.trimester of pregnancy.

This is a topic that is currently gaining in importance. It AIDS some information that we are not able to obtain from 2D ultrasound.

This is an overview of the work.

The project meets all the requirements.

After contact, the author has fulfilled all the objectives that have been awarded the trainer.
