

## **ABSTRACT**

**Title:** Organized Forms of Pupils' Leisure Time Physical Activities at the second grade of Primary School in Ostrov.

**Objectives:** The aim of this Master's Thesis is to survey the organization which offers physical activities to the students in Ostrov and their range of sports clubs. Using questionnaires, I want to find out how much students in Ostrov (6th and 9th class of elementary school) are interested in sports offered by different organizations.

**Methods:** This master's thesis have an empirical character. The qualitative research is used according to the surveying in Ostrov's sports organizations. There is the quantitative method connected with the questionnaires and research questions.

**Results:** The city of Ostrov offers a variety of organized physical activities for 2nd grade students of Primary School. The biggest one has the Town house of children and youth. The interest from the side of children is not that big, students are more interested in unorganized sport. The most visited activities are: soccer for boys and volleyball for girls. School sports clubs are popular as well.

**Keywords:** organized sport, students/pupils, pubescence, sport financial support, elementary school.
