

My diploma thesis is mainly concerned with the prevention of the social pathological phenomena on the primary and secondary schools and the role of the school methodist of prevention. The first section contains terminology and legislation from the domain of prevention, the rest of it take care of description of external and internal preventist operating at the primary schools. In the second part I am trying to make reader familiar with the basic competitions of prevention and with methods and forms of education, capable of passing desired behavioural models and social skills to the students of primary schools. The third part is devoted to the school methodist of prevention, to the description of his activities at the primary schools, his competencies. Along with it, there are informations about Minimal prevention program - basic set of rules and suggestions for prevention. The fourth part is dedicated to opinion poll amongst the school metodist of prevention in the area of Mlada Boleslav.
