

Abstract

The goal of the submitted thesis, “The Monument Protection and Buildings“, is the presentation of current legislation on protection of cultural monuments, buildings specifically. After an introduction, containing the goals of the work, a brief history of conservation and resources, follow the chapter explaining the basis terms. The next part includes the question of the declaration of buildings as cultural monuments. The following chapter deals with the care of monuments, especially with the obligations of the owners of the cultural monuments to provide a proper care for these buildings, with the consequences of violation of those obligations and penalties according to the State Monument Act. At the end, the process of cancellation of declaration as a cultural monument is presented, and so is the removal of building. The last part describes the legislation on protection of buildings which are not cultural monuments, but they are situated in a protected area.
