

## Anglická anotace

### Preventive Educational System of Giovanni Bosco

Proposed thesis presents Preventive Educational System. This System is suited especially for teenagers. The thesis describes its advantages (kindness, holistic development of personality etc.) and disadvantages (labor-intensive, exploitability, etc.). Preventive Educational System was implemented by Priest Giovanni Bosco during industrial revolution in Northern Italy in 19<sup>th</sup> Century. The thesis describes and evaluates educational agents suitable for educators and tutors. There are mentioned risks and charges posed on them and factors making education ineffective.
