Abstract

The bachelor thesis examines possibilities of comics as an educational tool in the Czech environment. It consists of a theoretical part devoted to comics history not only in Czech Republic but also in the world, and of a practical art part composed of author's original fairy-tale comic, and of four comics of children produced under the author's guidance. The comic has pictures on 40 pages, and scenario on 24 pages, in attachment.

In the pedagogical part, author leads the pupils to use some of the elements and motives presented in his comic. Literature sources used in this thesis are listed at the end.

Keywords: authors's comics, fairy-tale comic, comics, sequence, narration
