

Annotation

The theme of my work is domestic violence against seniors. This phenomenon represents a serious social problem that deserves our attention.

The theoretical part deals the types and specifics of violence. I describe the dynamics of violence, which occurs in such a damaged relationship. I try to describe possible solutions of this problem. In my work is also a list of organizations which can seniors contact.

The practical part includes research on public awareness at the age 50+ of elder abuse. Here we can find the myths that appear in society and also hinder victims begin to solve their situation.

Each of us may encounter violence. We should be able to identify the problem and knowing where to go for help.
