The bachelor thesis deals with providing access to electronic resources (ER) at Jan Palach Library CUFA. The theoretical part of the thesis defines term ER, describes their typology, deals with acquisition and management and introducing tools for using them. The thesis describes experiences of Jan Palach Library CUFA with providing access to ER and deals with information behavior of ER users. The aim of the thesis is to describe a situation in ER management on example of an university library on Faculty of Arts of Charles University in Prague. The practical part of the thesis is an user research on the method of the survey which results that situation in ER use is slowly getting better, users do not feel foreign language ER production as problem and just only small group of users attended workshop dedicated to ER, because users do not feel the need to.
