

ABSTRACT

Title

The success of swimming clubs of the Czech Republic in the youth category

Objectives

The goal is to find out the success rate of swimming clubs on summer CZ championships in youth category during the past years. To compare if only the same clubs were in final heats or there were significant participation of individual clubs.

Methods

It is a historical comparative research conducted by comparing data over a longer time period in more places. Summary of data was carried out in a way that the analysis method was used for the data classification and the synthesis method was used for the result summary of data.

Results

By comparing the number of representatives from each of the clubs in the final heats in selected periods and specifically in 1979, 1989, 1999, 2009 and 2013 in selected age group of adolescents was found based on summary of the results that there are here the most successful clubs: Comet Brno, Swimming sport club Ostrava and Bohemians Praha.

Keywords: competitive swimming, swimming clubs, swimming performance, junior age championship, the success
