

Abstract (in English):

The aim of this dissertation is arranging of the library fund of zámecká knihovna Mladá Vožice. The main purpose of this paper is to define this fund with respect to the provenience and its content. Contemporary conditions of the library are outlined in the Introduction. In the following chapters the history of the castle as well as the history of the noble families involved in establishing of this collection is being described. The main emphasis lays on the family of the collections founders –the family of Kuenburg. Fourth chapter describes history of the library on the basis of provenance research. In accordance with this is the identification of the books owners from Kuenberg, Spiegefeld and Schoenfeld family. In the same manner different families and persons with no direct lineage to Kuenbergs are characterized. At the same time this part of the work engages the characteristics of the fund in respect to particular members and partially also including the content characteristics, which are being elaborated properly by means of thematic groups in the following chapter. The information about arrangement of the fund are mentioned on the basis of the archive material and sources. Conclusion is made as a summary of the work, including the overview of its aims and achieved results.
