

The aim of this bachelor's work *Integration of People with Brain Injury or Damage into Society and its Importance* is to find out what is the influence of the organization „Dílňy tvořivosti“ on integration of people with brain injury or damage. Dílňy tvořivosti is an organization which focuses on work with people with brain injury or damage. I try to find out at my bachelor thesis how much Dílňy tvořivosti are important for people with brain injury or damage in their integration and how they are satisfied with services which Dílňy tvořivosti offer them. Bachelor thesis includes two parts, theoretical and practical. In the theoretical part consequence of brain injury or damage, functions and aims of ergotherapy and acquirement of working habits are described. There are also traced availability of social services for people with brain injury or damage and all services provided to people with brain injury or damage too. The Last chapter of the theoretical part is devoted to organization Dílňy tvořivosti, its history and its services which they offer. The aim of practical part is to find out how much Dílňy tvořivosti are important in integration into society. The first part includes three case stories of people with brain injury or damage. Further there are described causes of their brain injury or damage and importance of Dílňy tvořivosti in their life after the injury or damage. The Main part of the practical part is a questionnaires inquiry. I addressed people with brain injury or damage who have visited Dílňy tvořivosti. They completed a short questionnaire and I created a questionnaire inquiry based on filled in questionnaires.
