

My final work is called „Actual situation of churches in the town of Olomouc.“ I was interested in a sort of christian churches in Olomouc and their activities. I visited Olomouc's churches, celebrations and I talked to priests, pastors and with churches. I asked them about church's life, social and charity work, activities for public, activities with other churches. I try to summarize information, which I took during my visit in the last chapter. I write about activities for community, activities for public and actions with other churches in the town of Olomouc. I write also about the opinions of „faithless people“ about church's work in Olomouc and church's work in the society. I made a list of questions and I gave it to „faithless people“. My final work is divided into three parts. The first one is just theoretical. There is the basic information about the history of church, the structures of churches, the sphere of activities in church and ecumenism. The second part includes my practical work. I give overview the Churches in Olomouc and their work here. I describe the whole situation of all the churches here. The third part is a short summary about the actual situation of churches in the town of Olomouc. There is the offspring of exploration among the “faithless people”. I was interested in their opinions about churches working, about their knowledge of church's work. This topic is very complicated and large therefore I give just a few answers and opinions here. That is why I can show only general deductions. After all this work is very important, in my opinion. Because it has never been written yet. I hope that this work can help many people who are interested in churches in Olomouc.
