

Dissertation "Positive Sides of Squatting" reveals ideology of squatters and what they pursue. Main objective of this dissertation is to demonstrate positive sides of squatting. Theoretical definition of the term "squatting" is analyzed in the first part of the study using different social sciences. Furthermore, the study considers one's motivation and thoughts, which lead to squatting. Also, history of squatting along with the main events that have influenced squatting are discussed. Finally, this dissertation focuses on current squatting issues and provides deep insight into two existing squats by interviewing the residents.
