

Resumé

Title:

The analysis of match plot – standard situation

Work objectives:

The analysis of fruitfulness and performance of the offensive activity during the standard situations. The determination of key factors leading to overcoming the rival's defense and scoring a goal at standard situations from the World championship 2006 and Champions leagues 2004/2005 a 2005/2006. Graphic demonstrations and description of particular standard situations which were finished with the goal.

Methods:

The research was accomplished by indirect observation from DVD with all goals scored at these competitions. There was used the qualitative and quantitative analysis at this research. There were followed all the elements of performance in each standard situation. The graphic demonstration of each standard situation has showed us the models, which we can break in to the training process and transfer to another performance group.

Results:

The results show us which methods of playing the standard situations were used at the world championship. Also the new methods which lead to scoring a goal and the frequency of appearance of these factors.

Key words:

Football, the standard situation, the attack activity, free kick, corner kick, throw-in, penalty kick.
