

## **Abstract**

The diploma thesis deals with the area of quality of further education. It focuses in detail on the concepts of quality of further education, standardized quality management systems at international level (ISO 9000, EFQM Model Excellence) and specific systems used abroad (Swiss model eduQua and German model LQW). The work focuses on specific concepts and proposals of quality education systems developed and implemented in the Czech Republic. The output of the thesis is an analysis of selected concepts (National Qualification System, Project Concept, Quality in Further Professional Education), critical assessment of their form (methods, methodology) and reflection of their implementation into practice and impacts on quality in further education. The thesis links the theoretical knowledge with the practice and on their basis it presents its own proposal of possibilities of solution of system quality assurance in further education.
