Keywords: history, pharmacy education, Charles University, Faculty of Pharmacy in Hradec Králové, dean, private and professional portraits.

Subject and aim of this thesis: Use available resources to obtain information and backgrounds in order to create professional and life portraits of all deans of the Faculty of Pharmacy of Charles University in Hradec Králové. Process this information based and convert it into a complete unified form. Chronologically present individual portraits and record their views and opinions on being the head of the faculty. Individually sort answers to prepared questions. Clarify the place, role and scientific profiles of these important personalities, aiming to maintain their legacy.

Methodology: The methodology follows the original diploma thesis - the available resources on life and work of the deans of the faculty served to obtain the necessary information - especially jubilee articles in professional journals, collections, online articles, books. To complete their personality profiles, personal interviews with the former deans were necessary (only some of them participated). Audio recordings were taken at these interviews; these are another output of this thesis. In addition, the deans were asked to fill in a set of questions, mainly related to the period when they were head of the faculty and they were asked to evaluate their activity (positive and negative) in this position (only some of them participated). Their responses are also part of this thesis.

Conclusion: Professional and life medallions of all deans of the Faculty of Pharmacy of Charles University in Hradec Králové have been collected and unified in this thesis. Audio recordings of four deans have been taken and answers in the attached questionnaire have been sorted.
